

**Kellogg Company U.S. Products That Do Not Contain or
Declare Peanuts or Tree Nuts**

DATE OF ISSUE: August 25, 2011

ISSUED TO: Kellogg's Food Away From Home Customers

As of the date of issue, the following Kellogg U.S. products DO NOT contain or declare Peanuts or Tree Nuts. Products are subject to change without notice. ALWAYS refer to on-package labeling for the most accurate nut and allergen information.

The FDA defines a food allergy as a specific type of adverse food reaction involving the immune system. The Food Allergen Labeling and Consumer Protection Act identifies the eight most common allergenic foods as: peanuts, tree nuts, milk, eggs, soybeans, wheat, fish and shellfish. According to the Food Allergen Labeling and Consumer Protection Act, these eight major food allergens account for 90% of all food allergies. All of these food allergens have caused anaphylactic reactions resulting in death. The Kellogg Company will declare the presence of these ingredients in the ingredient list and in an allergen box adjacent to the Nutrition Facts product information on each labeled product. The declaration is made in the form of a "Contains" and/or "May Contain" statement within the allergen box.

The list above contains U.S. products for which all product sku's DO NOT contain or declare peanuts and/or tree nuts. The definition of tree nuts in this letter excludes coconut. *Products marked in the list above contain coconut. The U.S. products listed ARE NOT allergen free. Some contain milk, egg, soy, or wheat ingredients. Additionally, this is not an all-inclusive list of peanut and nut free items. Some U.S. product items may differ from sku to sku. For those products not listed, please check the allergen information printed on each sku for the most up-to-date peanut and/or tree nut declaration.
